SMALL TREE LIST

This is a list of small trees that may be suitable for planting in your area. This list is not comprehensive and you should seek information on these and other suitable trees. Look for information on the Internet, library, gardening books and magazines and by talking to horticulturalists/gardeners. Look at what is growing well in your neighbourhood.

Plants benefit from soil improvement prior to planting.

Plants require extra care (regular deep watering and mulching) to get them established.

Trees should be located so they have enough space (width and height) and do not conflict with services (power, water etc) or your neighbours.

Some Suggested Species

Scientific Name	Common Name	Approx. Mature Size	Description
*Acacia sp.	Wattles	Up to 10m	Yellow/Cream flowers. Native.
Acer buergeranum	Trident maple	8m	Bright red leaves in autumn, deciduous
Acmena smithii (cultivars)	Lilly Pilly	10m	Bushy with berries. Native.
Agonis flexuosa	Western Australian Willow Myrtle	8m	Drooping foliage, Cream/white flowers. Native.
Albizia julibrissin	Silk Tree	8m	Deciduous, Pink flowers
